

**ICCAS 2023**

The 23<sup>rd</sup> International Conference on  
Control, Automation and Systems

📅 October 17(Tue)-20(Fri), 2023

📍 Yeosu Venezia Hotel & Utop Marina Hotel, Korea

## Call for Papers – Open Invited Session

### Machine Vision and Perception

Chair: Prof. Kanghyun Jo (University of Ulsan)  
acejo2208@gmail.com

Image and video information is widely used nowadays. Based on the vision information processing and inference, vision intelligence methods are investigated and now have wide uses for robot, machine and other services. In the special session we would like to collect uptodate research submission, eg. various image processing, feature treatment, and recently developed architectures of deep learning methods, in divergent areas and discuss with participants in the presentation.

We welcome contributions on this research topic. Please visit our website for details.
