

**ICCAS 2023**

The 23<sup>rd</sup> International Conference on  
Control, Automation and Systems

October 17(Tue)-20(Fri), 2023

Yeosu Venezia Hotel & Utop Marina Hotel, Korea

## Call for Papers – Open Invited Session

# Optimization Based Control and Its Application

Chair: Prof. Jung-Su Kim (Seoul National Univ. of Sci. and Tech.)  
jungsu@seoultech.ac.kr

Prof. Shuyou Yu (Jilin University) / shuyou@jlu.edu.cn

Due to advance of optimization theory, optimization based control like MPC (Model Predictive Control) has been drawing more attention from both academia and industry. Moreover, recent embedded systems with powerful computation ability have broadened the range of new application areas of optimization based control. The topic of this invited session includes control synthesis based on optimization methods and practical applications of optimization based control design.

We welcome contributions on this research topic. Please visit our website for details.
