

ICCAS 2023

The 23rd International Conference on
Control, Automation and Systems

📅 October 17(Tue)-20(Fri), 2023

📍 Yeosu Venezia Hotel & Utop Marina Hotel, Korea

Call for Papers – Open Invited Session

Soft Wearable Robots

Chair: Prof. Kyujin Cho (Seoul National University)
kjcho@snu.ac.kr

Prof. Byunghyun Kang (Sejong University)
briankang@sejong.ac.kr

Recently, there have been significant advances with the emerging interest in soft wearable robots. Soft wearable robots are now being developed not only to assist the disabled but to assist various people in their daily lives in various applications. This session aims to share recent studies related to soft wearable robots, which include mechanism, control, sensing, artificial intelligence, and clinical tests. Potential technologies such as soft robot mechanisms are also welcomed.

We welcome contributions on this research topic. Please visit our website for details.
